

ShawnVinje Milestone 2 Review

Quality of Work:

- 3 points
- The work looks correct and organized and the readme gives a good overview of the project. Nothing to change.

Project Progress:

- 3 points
- The main features of the project look to be done and are demonstrated. Would just continue with what is planned.

Video:

- 3 points
- Video goes over the progress that was made. It shows the various features of the project and show how it works. I like how the video has window showing the code and a video of you presenting (the picture in picture).
