

## SHAWN VINJE

### Project (Task Manager)

Category	Full Marks (3 Points)	Partial Credit (2 Points)	Partial Credit (1 Points)	No Marks (0 Points)	Score
Quality of Work	Work (e.g., code) looks correct and organized. The project's readme file is clear, intelligible, and give a good idea of what the project is about.	Work (e.g., code) looks mostly correct and organized. The code could be better structured. OR the project readme file is somewhat unclear.	Work (e.g., code) is mostly disorganized. OR the project readme file is very unclear.	No code is given.	3
Comments (e.g. Give an example of what could be improved. How can the code or readme file be improved?, etc.)	The code looks good so far and is organized in a way that gives a good head start				
Intellectual Merit	The project looks interesting, creative, and/or substantial.	The project is interesting, creative, and/or substantial, but does not seem feasible to do in a semester.	The project lacks substantial complexity.	No code is given or the project description is too vague to determine if the research has merit.	3

<b>Comments (e.g. Give an example of what could be improved. If the project is too complex, what parts of the project could feasibly be done? If the project is too simple, what features could be added?)</b>	The project looks substantial enough to successfully show what was learned as a computer science major and can be done in a semester since it is already started				
<b>Video</b>	<b>The video gives a helpful, clear depiction of the project.</b>	<b>The video gives a helpful, clear depiction of the project, but is confusing or vague in parts.</b>	<b>The video does not give a helpful, clear depiction of the project.</b>	<b>The video is missing or is inappropriate.</b>	<b>2</b>
<b>Comments (e.g. Give constructive feedback to help improve the presentation style.)</b>		The only part that was concerning is that the code might not be as structurally sound by the end of the project if the code is not reviewed and ran very frequently; therefore, if the code is			

		not sound then the task manager can easily become confusing so a clearer structure further along in the project would help, but that can hardly be talked about in a 5 minute video
